Hollandale's DRINKING WATER IS **SAFE** DRINKING WATER PROBLEM CORRECTED

What should I do?

You can stop boiling your water, You can now use/drink your water. Flush your plumbing system. Run each cold-water faucet for five minutes or until the water is noticeably colder. Use your tap water as usual. For more information about flushing, visit page 3 of the [Community Drinking Water Advisory Guidance](https://www.health.state.mn.us/communities/environment/water/docs/com/dwaguidance.pdf) (<https://www.health.state.mn.us/communities/environment/water/docs/com/dwaguidance.pdf>).

What happened?

We notified consumers on 1/27/2026 of loss of pressure in our system due to a watermain break, and issued a Boil Order. We are pleased to report that we have corrected the issue. **The Drinking Water Advisory has ended.** We apologize for any inconvenience this may have caused and thank you for your patience.

What may be the health effects?

The incident is resolved. However, if you experience unusual symptoms and they persist, it is recommended you seek medical advice. People at increased risk should seek advice from their health care providers about drinking water.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
